SANJANA PURBIA

DevOps Engineer · AWS Certified Cloud Practitioner

sanjanapurbia3112@gmail.com | +91 9521618221 | LinkedIn | Udaipur, Rajasthan, India

PROFESSIONAL SUMMARY

DevOps Engineer with 2 years of hands-on experience automating cloud infrastructure, building CI/CD pipelines, and managing containerized microservices on AWS. Delivered 70%+ reduction in deployment time and 80% reduction in manual operations across AgriTech, eCommerce, and EV platforms using Jenkins, Docker, and Terraform. AWS Certified Cloud Practitioner with proven ability to manage multi-cloud environments (AWS, GCP, Azure) and drive infrastructure-as-code adoption. Actively seeking a high-growth DevOps role with greater scope and responsibility.

TECHNICAL SKILLS

Cloud & IaC	AWS (EC2, CloudFront, S3, RDS, IAM, ALB, VPC), GCP, Azure, Terraform, Ansible
Containers	Docker, Docker Swarm, Kubernetes, Rancher, Portainer
CI/CD & GitOps	Jenkins, GitHub Actions, ArgoCD, Git, Shared Libraries
Scripting	Python, Bash, PowerShell, YAML
Monitoring	CloudWatch, Uptime Kuma, PagerDuty
Databases	MySQL, PostgreSQL, DynamoDB
OS	Linux (Ubuntu)

WORK EXPERIENCE

DevOps Engineer | Spark Eighteen *Jan 2025 – Present*

- Architected and maintained CI/CD pipelines using Jenkins Shared Libraries, automating builds and deployments across dev, staging, and production environments for 5+ client projects.
- Orchestrated multi-service deployments on AWS (EC2, CloudFront, S3, RDS), cutting manual deployment time by 70% and reducing release cycle duration from days to hours.
- Containerized microservices with Docker, reducing environment-specific issues by 60% and enabling consistent deployments across all stages.
- Managed ArgoCD for GitOps-based deployments, ensuring declarative, auditable delivery pipelines.
- Established proactive monitoring using CloudWatch and Uptime Kuma with PagerDuty alerts, reducing mean time to resolution (MTTR) for production incidents.

DevOps Intern | Spark Eighteen *Jul 2024 – Jan 2025*

- Deployed 10+ containerized applications using Docker and Docker Swarm across multi-container environments.
- Automated infrastructure provisioning with Terraform, building 15+ reusable modules for AWS resources and reducing setup time by ~40%.
- Migrated cloud services from Azure to GCP for YoCharge EV platform, optimizing costs and improving availability.
- Implemented CI/CD best practices including automated testing, code quality gates, and security scanning.

KEY PROJECTS

EV Charging Platform — YoCharge *2024*

- Automated full AWS infrastructure using Terraform (EC2, ALB, RDS, S3, CloudFront, IAM, VPC), increasing deployment speed by 50%.
- Built CI/CD pipelines for Docker-based deployments and migrated services from Azure to GCP for cost optimization.

- Set up monitoring with Uptime Kuma and PagerDuty for high-availability alerting across regions.

Stack: Docker · Terraform · AWS · Azure · GCP · Jenkins · PostgreSQL

AgriTech — Uncompromised *2024*

- Built Jenkins pipelines with Shared Libraries for fully automated CI/CD, reducing manual release intervention by 80%.
- Integrated CloudFront + S3 for frontend hosting and automated PostgreSQL dump uploads using pre-signed URL access control.

Stack: Jenkins · AWS (S3, CloudFront, RDS) · PostgreSQL · Shell Scripting

eCommerce Platform — Dnatur *2024*

- Engineered CI/CD pipelines via Jenkins for backend and CloudFront for frontend, eliminating deployment downtime and achieving 100% SSL coverage across all environments.
- Automated SSL certificate management with Let's Encrypt and implemented secure data sharing via S3 pre-signed URLs.

Stack: Jenkins · AWS (CloudFront, S3) · PostgreSQL · Shell Scripting

EDUCATION

B.Tech in Computer Science *2019 – 2023*

Techno India NJR Institute of Technology, Udaipur, Rajasthan

CERTIFICATIONS

AWS Certified Cloud Practitioner — Amazon Web Services | 2026
